

## FARSITE Feasibility – expedite your planning phase for clinical trial success

Overcome the biggest hurdle to clinical trial initiation with our seamless find and recruit solution.

Protocol design

Anonymised EHRs searched

Eligible patients identified

GPs / Clinicians decide which patients to invite

Invitations sent by FARSITE Recruit

## Design and refine an optimal protocol

FARSITE allows you to test your protocol to ensure you can identify enough participants to yield statistically significant results.

# MILLIONS

We search millions of patient EHRs to find eligible patients

## Establish feasibility

Feasibility that takes weeks to months can now be achieved in a day, meaning you can quickly progress your trial to participant recruitment.

## Rapid recruitment

FARSITE is proven to accelerate the end-to-end recruitment process, improving recruitment conversion, lowering screen failure rates and ensuring successful follow up rates, with patient confidentiality maintained throughout.<sup>1</sup>

**30%**

Consistently achieving a **30%** average patient conversion rate

**20,000+**

With **20,000+** patients recruited

**3%**

And, less than **3%** of patients withdrawing

## CLINICAL DELIVERY

### Supported by clinical trial experts

Our experienced Clinical Delivery Team can provide comprehensive support throughout the recruitment process and beyond.

We utilise our expert Clinical Delivery Team and Clinical Operations Team, as well as our extensive NHS and academia networks.

**FARSITE accelerates the clinical trial recruitment process, saving time and reducing costs.**
